## **DETAILED ACTION**

### ***Reasons For Allowance***

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to an improved pushbutton comprising a pair of elastic sections which sandwich a protrusive button such that the button is depressible to generate a compression and releasable to be extended. The combinations of the closest prior art of Boireau et al. (US 2001/0040556) and Masuda (US 2003/0221943) show a similar invention, however, they fail to teach that each of the elastic sections is made of an elastic and flexible strip and formed in a undulate manner abutting a lateral side of the button, and has a top section connecting to the lateral side of the button as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
